Residential Address: 22 Ambassador Park, Blandford Road, Northriding.
Contact number: 083 383 7649/50

Brief Statement of Education vision

a) About Sagan Academy

Sagan Academy believes the current achievement gap reflects a systemic inadequacy in understanding how young adults learn, what motivates them to learn, and what they need in order to learn well.

Sagan Academy envisions to employ the best practices of traditional education design via the Cambridge International Examinations curricula; small and personalised learning environments; a focus on measurable international results and add a truly innovative blended learning model that emphasises experiential learning, development of deeper learning skills, integration of Language, Art, Science and Technology and real-world every day experience offered as an international qualification.

Sagan will use specific learning tactics built upon the four key R's: Rigor, Relevance, Relationships, and Results.

A vibrant learning community, like Sagan Learning Centre, applies compassion and high expectations to inspire and empower students choosing to attain a qualification via the Cambridge Curriculum.

b) Sagan Academy Philosophy

1) Core Values:

- Rigor
- Relevance
- Relationships
- Results

2) Tradition of Diversity

Sagan Academy combines cutting edge practices in five domains: competency-based progression from Checkpoint through AS/A levels; use of a unique blended learning that addresses skill gaps while simultaneously challenging students with higher order thinking and critical thinking style tasks; an explicit affective program to build cognitive confidence and self-efficacy, real-time student performance analytics; and a "limitless campus" of extended online and community-based learning opportunities supported through Google for Education technology.
